

Curtis[®]

Evolutionary. Intelligent.

GEMX

And absolutely brilliant!

Introducing GemX™ IntelliFresh® Coffee Brewing System with FreshTrac® Exclusively from Curtis

More than a coffee brewer. A true thinking machine.

Serving great coffee amid the bustle of a thriving foodservice business isn't easy. It's essential.

But what if you didn't have to think about all the steps that go into making a perfect brew? Or worry about having fresh product ready across all your dayparts?

What if there was a brewer that thinks for you, making perfectly hot, totally fresh and delicious coffee with the push of a button? Each brew with impeccable, exacting flavor that meets SCA Golden Cup Standards. One that lets you monitor freshness at a glance – without a second thought. An innovation combining exceptional brains and uncommon beauty.

Introducing the Curtis GemX.

GEMX

Your coffee program has never looked better

G4 GemX Single and Twin Brewers

Sitting atop a proud lineage of Gemini® Satellite Brewing Systems stretching back almost 40 years, GemX represents the new pinnacle of Curtis innovation.

From convenience stores to hotels, restaurants, roasters, or specialty coffee houses, GemX is designed to power a superior coffee program – boosting traffic, easing labor and delivering a better customer experience in every cup.

Embrace the neXt evolution in gourmet coffee brewing.

G3 GemX Twin and Single Brewers

GemX Twin and Single Remote Stands shown with 1.5 Gallon GemX Satellite

Press once for great coffee

From simple operation to precise fine-tuning of recipes, Curtis innovation infused into the GemX makes brewing gourmet coffee easy for all skill levels.

Select from your choice of two digital systems.

G3 GemX

- Universal Control Module features an easy-to-read, true-green LED display and simple interface
- Provides precise, digital fine-tuning of the brewing process and complete control over pre-infusion, pulse-brewing, water bypass and more
- Pre-set, one-touch global recipes

G4 GemX

- A large 4.3" touchscreen features an icon-driven interface that streamlines and simplifies operation
- On screen instructions provide fast, intuitive training and real-time feedback on the brewing process
- Self-diagnostics alert the operator for preventive maintenance
- One-touch setting of brew recipes

An innovation for freshness

Equipped with Curtis's evolutionary FreshTrac® technology, GemX satellites streamline labor by letting you track coffee freshness from across the room.

No guesswork. No distracting alarms. Just fresh, great-tasting coffee all day long. The secret is a simple, intuitive yet highly intelligent LED system:

During the brewing phase, LEDs flash. Then gradually increase as the GemX Satellite fills with fresh coffee.

LEDs glow solid when brewing is complete and a full vessel of coffee is ready to serve – progressively deactivate as volume decreases.

At the end of the pre-set freshness time, LED lights change color and begin to flash indicating it's time for a new brew.

LEDs can be color-customized in red, yellow, green or white to suit your operational needs and preferences.

Hot, fresh technology

Delicious, perfectly hot and fresh coffee not only keeps customers coming in... it keeps them coming back. It also cuts waste and helps preserve profits.

Embodying decades of coffee brewing expertise, the GemX features essential thermal efficiency and IntelliFresh® technology to help keep coffee at its ideal temperature regardless of the volume in the satellite.

- Digitally controlled minute pulses of heat maintain freshness without cooking
- Encapsulated "brains" inside each satellite include four sensor points that constantly monitor brew level and status
- When moved to remote GemX stands, GemX satellites maintain the same freshness "intelligence"

Go for the golden

With GemX, expect nothing less than exceptional. This brilliantly designed machine creates a brew that meets exacting SCA Golden Cup Standards, delivering the full flavor of the artisan roasts discriminating customers crave. It offers:

- Preprogrammed gourmet recipes
- A specially designed spray head and brew cone that create ideal turbulence to maximize coffee extraction and minimize liming
- IntelliFresh® and FreshTrac® technology to ensure coffee freshness and flavor

BREWING
Indicated by flashing lights that build with volume.
Solid lights decrease as coffee is dispensed

BREWING COMPLETE
LEDs solid

FRESHNESS/VOLUME EXPIRED
Indicated by flashing

SATELLITE EMPTY
Indicated by flashing

Brilliant design, elegant styling

GemX truly reflects the beauty behind the brew with a striking, streamlined form factor that offers an array of brilliant design features:

- No sight glass to break or discharge heat
- Sweeping radiused corners
- An elegant sloping chamfered top
- Sleek side panels with ventilation louvers in back
- A textured honeycomb face for a sophisticated look
- A modern, minimalistic LED display

You'll be proud to put this gorgeous brewer on display in your operation. But be ready for the comments—and compliments—from your patrons.

Integral USB port for updates and recipe standardization across multi-unit operations. (G4 models only)

Carry the day

Whether you need to serve lots of coffee or different coffees to meet the demands of your customers and dayparts, GemX smart satellite servers make it easy.

- Exceptional thermal efficiency and IntelliFresh® System keeps coffee fresher longer
- GemX stands can be placed wherever needed to create remote serving stations allowing GemX satellites to carry the same freshness "intelligence" as when on the brewer

- Full dispense satellite faucet with easy to clean design

We've thought of everything and more

Along with ingenious engineering inside and out, GemX offers smart design touches that add tremendous versatility and convenience to your operation:

- Sloping design for full evacuation of the satellite
- Fast flow hot water faucet
- Articulated faucet guard
- Locking lid and brew cone to prevent accidental spills

Articulated Faucet Guard
